

BIODIVERSITY BLITZ Challenge

Plant some **HABITAT** in your **BACKYARD**

Planting native plants in your backyard is a great way to provide habitat and improve biodiversity. Prickly and shrubby plants, such as spikey grevillea and bottlebrush, provide birds, small mammals and lizards with a safe place to hide from foxes and cats.

As the weather warms up, take the opportunity to create a hiding place and plant some habitat in your backyard.

Our Bushland Festival website has some great links to local plants in the Hunter region:

Show off your work!

Send in a photo or video of you answering the Biodiversity Blitz Challenge. Or show us an example of what you have done to help biodiversity at your place.

Upload them to the Creative Gallery on the Adventures at Your Place website:
