

BIODIVERSITY BLITZ Challenge

Build a WATERBUG model out of RECYCLED STUFF

Waterbugs, or aquatic macroinvertebrates, are small creatures that live all, or part, of their life in the water. Waterbugs are a useful indicator of the health of streams, rivers, wetlands and ponds.

Check out this picture of a river which shows where you'll find the different waterbugs.

waterbugblitz.org.au/resources/Waterbugs%20Poster-web.pdf

Make your own 3D waterbug model out of recycled materials you have lying around your home or backyard.
