

BIODIVERSITY BLITZ Challenge

Attract all the **GOOD BUGS** by creating an **INSECT HOTEL**

Insects are a very important part of any ecosystem. They prey on other pest insects, provide food for lots of different animals, and help pollinate our plants so they can reproduce. **Creating an insect hotel introduces new habitat at your place** and will help to attract beneficial insects that will help control other pests.

Here's a fun, no construction required, Bug Hotel activity you can do at home:
